

Priyanshu Patel - Business Analyst

+91-9109489784 | itsmepriyanshu36@gmail.com | Bengaluru, India

Product & Data-focused Business Analyst experienced in **building and optimizing API-driven systems and workflows**. Proven ability to translate **business requirements** into **technical solutions**, perform **SQL-driven analysis**, and deliver automation and system improvements that enhance efficiency and reduce errors. Strong in **system design**, **data analysis**, and cross-functional execution across product, engineering, and operations teams. Proficient in **PostgreSQL**, **Python**, and **workflow automation**, with an **MBA (Finance and Business Analytics)** and **B.Tech (CSE)**.

CERTIFICATION

- **NISM Series VIII:** Equity Derivatives Certification (Valid till September 2027)
- **NISM-Series-XV:** Research Analyst Certification (Valid till October 2027)
- **Financial Modelling & Valuation Analyst (FMVA)**
- **Business Analysis Foundations: Business Process Modelling: LinkedIn**

EXPERIENCE

Business Analyst - Digit Life Insurance

June 2025 - Present

- Led end-to-end SDLC for Group Life products supporting a **₹1,500+ Cr premium portfolio** and **2 lakh+ monthly transactions**, delivering scalable features in Agile environments.
- Collaborated with **10–12 cross-functional stakeholders** to align priorities and drive execution across **sprint planning and release cycles**.
- Partnered with business teams to understand data needs, extract and analyze data using **SQL**, and deliver actionable insights that supported operational and product decisions.
- Analyzed high-volume transaction data using SQL to identify **inefficiencies, edge cases, and failure patterns, enabling data-driven improvements**.
- Designed scalable solutions through **GAP analysis on existing systems** — enabling API integrations, defining API contracts (request/response, error handling), database schemas, and **UI workflows aligned with Figma designs**.
- Authored **BRDs, SRS, and user stories** ensuring clear requirement translation and system-wide impact awareness across modules.
- Identified **business use cases** and translated them into **validation logic** and business rules, improving data accuracy and ensuring seamless policy issuance.
- Automated workflows by implementing 10+ business rules, improving accuracy by **18%** and reducing manual effort by **30%**.
- Led UAT with **80+ test cases**, ensuring end-to-end validation of system behaviour and integrations, reducing post-release defects by **40%**.
- Monitored system performance (API success/failure rates, processing efficiency) and performed **RCA using API logs and database analysis**, collaborating with engineering and **cloud/infra teams to resolve system and server-level issues**.
- Ensured **regulatory compliance of customer-facing documents** by validating data accuracy and alignment with legal and business requirements.

CORE SKILLS

- **Business Analysis:** Requirements Gathering, BRD / SRS Documentation, Stakeholder Management, GAP Analysis, User Stories
- **Agile:** Sprint Planning, Backlog Grooming, Software Development Life Cycle (SDLC), Test Cases Creation, Scrum Methodology
- **Technical Skills:** SQL, & Database Concepts, API & System Integration, Data Analysis, User Acceptance Testing (UAT), python
- **Tools:** Jira, Confluence, Microsoft Excel, Microsoft Word, Microsoft PowerPoint, Camunda, Postman, D-Beaver

INTERNSHIPS

Finance and Accounting Intern, Bharat Heavy Electrical (*May 2024 - August 2024*)

- Worked hands-on in **Oracle ERP** across **Billing and Accounts operations**, gaining direct exposure to enterprise financial-ops workflows.
- Executed end-to-end **invoice processing, verification, tracking, and reconciliation** through automated system workflows.
- Built dynamic **Excel-based MIS dashboards** and daily reports tracking invoice statuses, billing cycles, and turnaround time, **improving reporting accuracy by ~15%** — early hands-on with operational analytics and business KPIs.

Deep Learning Intern, Maulana Azad National Institute of Technology (*May 2023 - July 2023*)

- Built a computer-aided cancer diagnosis system using **Convolutional Neural Network (CNN) models** in **Python**, applying **classification ML techniques** to a real-world dataset.
- Executed **data preprocessing, model training, and performance evaluation** to enhance diagnostic precision.
- Achieved approximately **89% diagnostic accuracy**, demonstrating effective application of **classification and ML evaluation techniques**.
- Applied **machine learning workflows** and analytical problem-solving across iterative model tuning.

PROJECTS

RideCompare - Full Stack Mobile App

- Built a cross-platform Flutter app to compare real-time ride fares across platforms (**Uber, Ola, Rapido, Namma Yatri**) and redirect users to the **most cost-effective option**.
- Designed a backend fare engine using **Node.js** and **PostgreSQL**, incorporating dynamic pricing logic (slab pricing, surge/night multipliers) for accurate estimates.
- Integrated third-party **APIs (Google Maps/Places)** via backend proxy to enhance security and enable caching for performance optimization.
- Tracked actual vs estimated fares to evaluate prediction accuracy, enabling data-driven improvements to pricing logic.
- Deployed application with **CI/CD pipelines** and **automated testing (160+ test cases)**, ensuring system reliability and scalability.

EDUCATION

- **2025 - MBA/PGDM | Finance | Mukesh Patel School of Technology Management and Engineering, Mumbai : Grade - 3.56/4**
- **2025 - B.Tech | (CSE) | Mukesh Patel School of Technology Management and Engineering, Mumbai : Grade - 3.56/4**
- **2020 - 12th CBSE | PCM Marks - 85.4%**
- **2018 - 10th CBSE | Marks - 83%**

ACHIEVEMENTS

- Finalist in **EY Young Leader's Business Case Study Competition 2024**
- **Assistant School Captain** at **Campion School Bhopal 2018**

INTERESTS AND HOBBIES

- Sketching
- Fitness
